Case Study: Maaco Enterprises, Inc. Moves to Paperless Timesheet and Payroll System with iEmployee

Maaco Enterprises, Inc.
Maaco is a nationally recognized franchisor of automobile painting and repair outlets. With headquarters in King of Prussia, PA, the company has hundreds of automobile painting franchises across the country, as well as Canada and Puerto Rico.

The Challenge: Integrate Electronic Timesheets into Maaco's Existing Payroll System Without the High Cost of Additional IT Infrastructure.

Maaco's corporate management sought to eliminate as many paper processes as possible throughout their corporate headquarters in King of Prussia, PA and wanted to implement processes that wouldn't require a large IT investment. The company targeted their manual timesheet and attendance paper process as an area where they could move to a fully electronic bi-weekly payroll operation with relative ease. On a bi-weekly basis, Maaco's department managers submitted paper timesheets for over 160 employees. Time and attendance data was manually inputted for processing by their existing Ceridan payroll system.   Maaco's goal was to automate the payroll process by using electronic timesheets and automatically downloading into their Ceridian payroll system, and thus, eliminate the large amounts of paperwork typically generated on a bi-weekly basis.

The Solution: iEmployee's Electronic Timesheets Removed Paper from the Timesheet Process and Automatically Integrated with the Ceridian Payroll System.

iEmployee's on-demand timesheet solution helps organizations eliminate the paperwork and manual processes associated with time collection. The timesheet solution helps streamline the entire process, from entry, approval, tracking, and reporting of time and attendance for every employee across the organization. Information can be accessed anytime and from any location with a standard Web-browser and an internet connection. iEmployee's time sheet solution seamlessly integrates with major system providers, including Ceridian, ADP, Peoplesoft, Quickbooks, and many others.

Maaco chose iEmployee's Web-based Electronic Timesheet solution because of its low cost of implementation, and with automatic integration with their existing Ceridian

payroll system, allowed them to install a totally paperless process to operate their bi-weekly payroll system.

Using a standard Web browser, Maaco's departmental managers submit their electronic timesheets to payroll. Time and attendance information is instantly transferred to the Ceridian payroll system and checks are processed without manual paper input.

Ruthann Scarafone, Maaco's Payroll Supervisor, said, "iEmployee's electronic timesheet solution is fast, easy-to-use, and low in cost to implement."

Maaco Looks to iEmployee's iReports Module to Get Up-to-the-Minute Compensation and Hours Data for Each Employee.

With the successful implementation of iEmployee's electronic timesheet solution, Maaco is now evaluating iEmployee's iReports module.

iReports helps organizations track and analyze employee information, including time and attendance. The iEmployee iReports engine provides a number of built-in reports that give managers instantaneous access to departmental information. Commonly run reports can be saved and quickly accessed and information can be viewed in graphical format for easier analysis. iReports also allows the creation of custom reports for added flexibility.

"iReports will give us an up-to-the-minute, on-demand report of employee compensation and hours," said Scarafone. "iReports seems to be much easier to use than standard Crystal Reports."

About iEmployee
iEmployee is a leading provider of on-demand workforce management solutions, enabling companies to eliminate paperwork and dramatically reduce employee administration time from hours to minutes. iEmployee's full suite of Web-hosted Time & Attendance, HR/Benefit, Pay Stubs/W2 and Self-Service applications offer cost-effective solutions, requiring no IT investment or overhead. Endorsed by leading payroll providers, iEmployee is the solution of choice for over 1600 companies.
